MHC Series Hot Water Pressure Washers

Powered By: Gasoline - Heated By: Diesel/Oil

Landa's MHC is the most rugged, gasoline-powered, on-site cleaning machine on wheels. No other pressure washer in its class offers so much quality, safety, ease of service, functionality and stability in a medium-duty package. The MHC delivers cleaning power of up to 3.5 GPM and 3500 PSI and features a direct-drive high-pressure pump with 7-year warranty.

- ETL safety certified
- 2.7 to 3.5 GPM, up to 3500 PSI
- Direct-drive Landa pump with 7-year warranty
- Hour Meter and Adjustable Thermostat
- Subaru Robin or Honda Engines

**Water Jet:**  
For fast,  
stripe-free  
cleaning of  
asphalt or  
concrete

The Water Jet is the premier surface cleaner on the market attaching easily to a hot- or cold-water pressure washer to "mow" grime. With its infinitely variable rotary bar adjustment, the Water Jet can clean a wide variety of surfaces from concrete to asphalt. The stainless steel spray bar, with two precision spray nozzles, spins at an astounding 2000 RPM. Its pneumatic tires and leading swivel caster make for easy manoeuvring into corners and tight spaces. The side mounted trigger arm and wand allows for corner cleaning without detaching the water jet.

## Telescoping Wand: For safe, scaffold-free cleaning of hard-to-reach places

Landa's popular telescoping wands provide safe cleaning capability of up to 24 feet—long enough to reach gutters and eaves on a two-story building—without the need for a ladder or scaffolding. Made of fibreglass so they're lightweight and evenly balanced, each is rated for up to 3000 PSI and water temperature of up to 200°F. Additional accessories include a shoulder strap and belt as well as a gutter-cleaning attachment.

**Sandblaster:**  
For dust-free stripping of paint from walls, barnacles from ships, etc.

For the extra-tough cleaning tasks, wet sandblasting is the dust-free solution. The Landa sandblaster attaches to a hot- or cold-water pressure washer and, using a venturi, mixes in sand or other abrasive media with the high-pressure spray of the power washer to create enough cleaning power to strip paint off concrete or barnacles from a ship's hull. The sandblasting nozzle is made of tungsten carbide for long life. A variety of safety features, including a face shield, come standard with the sandblaster.
